

**Vivendi Consulting provides clarity, develops capability and delivers outcomes.**

We provide ‘big firm’ consulting support without the ‘big firm’ price tag.

We have over a decade’s track record of consistently delivering challenging projects and programs, change and transformation initiatives, strategies, business cases and data analytics.

We work in the infrastructure and business transformation sectors and have a 100% record of successful delivery across nearly 100 projects.

Our consultants are high-performing people formerly from ‘big firms’ – but who want to work in a more equitable, client-focused environment.

Fundamentally, we bring people together to solve complex problems, deliver challenging objectives, help people through change and setup projects for success.

**What we do:**

**Provide clarity –**

- Evidence-based strategies and policy
- Decision-making frameworks
- Facilitation of complex decision-making
- Translating strategy into deliverable programs
- Business model development and business planning

**Develop capability –**

- Enterprise capability development: including P3O (portfolio, program and projects)
- Organisation design
- Governance frameworks
- Operating model development
- Enterprise dashboards and reporting

**Deliver –**

- Program and project setup and management
- Change management
- Strategic and final business cases
- Operations reviews
- IT-enabled business transformation
- Process design including Lean & Six Sigma
- Enterprise risk management
- P3O establishment and oversight
- Advanced data analytics, including machine learning and artificial intelligence (AI)

**Example projects include:**

**Clarity:**
