vivendi consulting

bringing your vision to life

Vivendi Consulting provides clarity, develops capability and delivers outcomes.

We are former 'big firm' consultants but without the 'big firm' price tag and internal distractions. Our core philosophy is to work collaboratively with our clients to help them realise their visions.

We have a 10-year record of consistently and successfully delivering high-profile strategies, business cases, complex programs and cutting-edge data analytics.

Our fundamental capability is in bringing people together to solve difficult problems and achieve challenging objectives.

Our capabilities include:

Provide clarity –

- Developing strategy and policy, supported by advanced analytics
- Developing strategic and final business cases
- Facilitating difficult decision-making
- Translating strategy into executable programs

Develop capability –

- Organisation design
- Program and project management capability development
- Operating model development
- Decision-making framework development
- Enterprise dashboards and reporting
- Business and organisation unit planning

Deliver –

- Program and project management
- Change management
- Business transformation and improvement
- IT-enabled business transformation
- Process design including Lean & Six Sigma
- Enterprise risk management
- Advanced data analytics, including machine learning and neural networks

Example projects include:

Clarity:

- TfNSW: Sydney's Rail Future (the first successfully-delivered rail strategy for over 10 years)

- TfNSW Mobility as a Service (MaaS) Strategy
